

**AMENDMENTS TO THE SPECIFICATION:**

Please replace the paragraph beginning on page 8, line 14 and ending on page 8, line 17, with the following amended paragraph:

Referring now to Fig. 1, there is shown a computer system 10 including a computer network 12, a client 14 and a server 16. The network 12 may preferably be a public computer network, such as the Internet, however, the network 12 may be any local or wide, private or public, computer network.

Please replace the paragraph beginning on page 14, line 5 and ending on page 14, line 10, with the following amended paragraph:

The server 16 may also vary the congestion window size as a function of a number of bytes in each of the RTP packets for which a respective one of the ACK packets has been received. This function depends on whether the present congestion window size is above or below a slow start threshold. The slow start threshold and the slow start algorithm is described in commonly owned, copending application Serial No 09/680,990, filed October 6, 2000.
